

Lesson 2: Formatting Cells in Excel

Formatting makes your worksheet look professional and easier to read.

1. Font

Change the appearance of text.

- Select the cells.
 - Go to **Home** → **Font**.
 - You can change:
 - Font style (e.g., Calibri, Arial)
 - Font size
 - **Bold** (**Ctrl + B**)
 - *Italic* (**Ctrl + I**)
 - Underline (**Ctrl + U**)
-

2. Font Color

- Select the cells.
 - Click **Font Color (A)**.
 - Choose a color.
-

3. Fill Color

This changes the cell's background color.

- Select the cells.
 - Click **Fill Color** (paint bucket icon).
 - Choose a color.
-

4. Borders

Borders make tables clear and organized.

- Select your data.
- Click **Borders**.
- Choose **All Borders**.

Example:

Student Marks

Kom 95

Ravi 88

5. Alignment

Control how text appears in a cell.

Options include:

- Left Align
 - Center Align
 - Right Align
 - Top, Middle, and Bottom Align
-

6. Merge & Center

Useful for creating a title.

Example:

1. Type **Student Report** in A1.
2. Select cells **A1:C1**.
3. Click **Merge & Center**.

The title will appear centered across all three columns.
